Are we all fairly Naive?

Hey water drinkers! No, I am not goading you. For goodness sake. Just trumpeting the news of the ubiquitous medical device water generator unparalleled in the world today. And why not? Not only has the company, Enagic USA, Inc., influenced thousands of doctors from over 41 countries to having the only medical device grade water generator in the world, they are satisfying tens of millions of people drinking Kangen Water™ for the last 50 years. Especially, those that know the difference and have a higher life expectancy than others. Yes you are right, the Japanese women have a life expectancy greater than others. Japanese men are next. Now that is the kind of water befitting of nature. Oh and as a note to life spans, Japanese are #1 on the list, and the USA is number 38, based on global statistics.

Kangen Water™ is very similar and in many instances it is the same as the water from Lourdes France, Tlcaote Mexico, Nordenau Germany (district of Schmakenberg) and Nadana India. The water in these places is called miracle water. Kangen Water™ has a high pH for drinking water (8.5 to 9.5 pH) which flushes out the acids in your body, and is one of the reasons the Kangen Water™ generator is certified as a medical device. Kangen Water™ has a high anti-oxidant capability that is 30 times greater than most other water that removes the toxins from your system and the free radicals, and this is the second reason why Kangen Water™ generator is certified as a medical device. The most important feature of Kangen Water™ is the ability of it to deliver the water to the organs faster because it is much smaller (7 times smaller than other water) allowing the Kangen Water™ to hydrate the organs quicker, and this is the 3rd reason why the Kangen Water™ generator is certified as a medical device. The Kangen Water™ generator is certified as a medical device by the Ministry of Health in Japan. Your brain and

eyes are cleansed in less than 60 seconds and your body's organs in less than 6 minutes. This technology created by Enagic is second to none. Their certifications speak volumes for the company which include but are not limited to certified as a medical device, registered as ISO 9001 and ISO 14001, Underwriter's Laboratory and CSA approvals, and many more. See this web site for all the certifications that Enagic has:

<http://www.h2osys.com/cert.htm>

Enagic USA, Inc. has spent 50 years developing what is called ionized electrolysis water generators. The Russians were the originals in designing ionized electrolysis water generators early in the last century. Enagic USA, Inc. took it another step farther and used this process in agriculture, resorts, then the health arena, and now they are in restaurants, resorts and golf courses, food processing plants, businesses and homes around the globe. Currently in 41 countries and just this year the first unit was installed in Yerevan Armenia.

If you are using any other kind of water processing device that filters water, reverse osmosis the water, softwater tanks, distills water (distillation processes), etc. you are drinking water that robs your body of the minerals to stay alive. Yes, to stay alive. You see if you do not hydrate your body with the proper minerals and the properties of water, then your body has to get the minerals from somewhere, organs, tissues, bones, etc. in order to keep you living. Add extra years to your life by drinking Kangen Water™.

One of the first bottled water companies in the 1980's was Evian. Do you know what that spells backwards?

If you were able to drink water that changed your life and was less expensive than bottled water, would you drink it?

If you were able to drink water that changed your health status from what ever it was to better than it has ever been, would you drink it?

Tell me more about water!

If you say you can't or you say you can, you are right.

It is not what people do not know. It is what people know that just ain't so!

- Will Rogers.
